We place students at the center of the learning process, encouraging them to take an active role, with our teachers acting as guides and key references for their linguistic and cultural immersion. fostering an environment where curiosity, interaction, and real-world communication drive their progress.

Methodology

Language in Action

At Cronopios, we adopt a flexible task-based approach. This means our students are the protagonists of their own learning process, using Spanish from the very first moment in classes across all levels. This approach fosters active participation and the development of practical skills in a dynamic learning environment.

The student as an active protagonist

Students take a central role in their learning process by completing tasks that engage them and allow them to use the language in real-life situations.

Practical use of the language

Tasks are designed to ensure language learning happens through effective and meaningful use, simulating real-life communication contexts.

Action-oriented learning

The teaching-learning process focuses on practical activities with a clear objective, facilitating the acquisition of more integrated and functional language skills.

Evaluation of process and results

Both the final product and the process of completing the task are assessed, valuing language use and the active participation of students.
